

Contract Mac and Linux Developers

Mercurial is a Victoria software company in business for more than 10 years. Our clients range from local small businesses to international corporations, from non-profit organizations to federal and provincial government. Although best known for creating the Netscape 8.x browser, we have completed well over 600 web, desktop, and cross-platform applications, and have developed a reputation for solving the most difficult (and most interesting!) technology issues.

We are currently looking for highly skilled Mac and Linux developers available on a contract basis to work on a variety of projects. Reporting to the Director of Operations, you will be part of a talented group working on some of the most advanced software applications around.

Qualifications:

- A Computer Science degree or diploma, or equivalent
- At least 5 years experience in web application or product development
- Experience in one or both of the following technologies (developers who have **both** Mac and Linux experience are preferred):
 - Mac programmer. - C/C++, deep Mac API understanding. Familiarity with GLUT, Cocoa, Mozilla an asset
 - Linux programmer - C/C++, deep Linux API understanding. Familiarity with GLUT, Mozilla an asset

To respond to this posting, send the following information to careers@mcomi.com

- Resume with project history
- Contract rates (use a four month solid work term as the basis)
- Start date availability

We prefer you to work onsite in Victoria, but offsite work is possible, if required.

No phone calls please. Only those candidates under consideration will be contacted. Thank you to all who apply.
